CoffeeShopManager	All				x		x			Possible Distributor Fees

**Note (1):** SPS supports the Magtek Mini Micr check reader for paper check guarantee plus the RDM imager for conversion with guarantee. The Magtek must be configured for a PC interface. The RDM does not need a modem as images are transferred to the PC for storage and subsequent uploading.

**Note (2):** SPS also charges a set up fee for Aloha, Micros, Positouch, and MaitreD installations. In addition to normal transaction fees, SPS charges a flat monthly fee in lieu of a restaurant pos surcharge. Sales agents should consult their pricing guide for this information.
